SKILLS

PROGRAMMING LANGUAGES

LIBRARIES/Frameworks

TOOLS / PLATFORMS

DATABASES

C, CPP, JS, Basic Python, HTML, CSS

React.js, Redux-toolkit, Express.js, Node.js, Chakra-Ui, Sass, BootStrap, material ui

git, Github, Linux, ThunderClient, Redux-Devtools

MongoDB, Basic SQL

PROJECTS / OPEN-SOURCE

SUMMARY_WITH_AI | [LINK](#)

JavaScript, CSS, HTML, React.js, Rapid Ai API

I developed this web application using Vite and React.js. The purpose of the application is to allow users to input a URL and receive a summary of the linked content. The application utilizes Vite, a fast build tool for React, to optimize the development process and improve performance and le Rapid API

E-COMMERCE-BACKEND | [LINK](#)

JavaScript, Node.js, Express.js, MongoDB

The backend of the e-commerce website is built using Node.js, Express.js, and MongoDB to provide a robust and scalable solution. Leveraging the power of Node.js and its asynchronous nature, the server-side logic efficiently handles a high volume of user requests. Express.js, a popular web application framework, simplifies the development process by providing a flexible and modular structure with MongoDB

E-COMMERCE_UI_REDUX_TOOLKIT | [LINK](#)

JavaScript, HTML, CSS, React.js, Redux-toolkit

The basic e-commerce website is developed using Redux Toolkit, a powerful state management library for JavaScript applications. Redux Toolkit simplifies the management of complex application states, making it an ideal choice for building e-commerce platforms.

MY_CRYPT0 | [LINK](#)

JavaScript, HTML, chakra Ui, React.js

The crypto trading advice platform developed with React provides users with valuable insights and recommendations for their cryptocurrency trading activities. By leveraging React's component-based architecture, you can create an interactive and responsive user interface that enhances the user experience.
